PLANNING DIVISION
INSTRUCTIONS FOR COMPLETING
ENVIRONMENTAL INFORMATION FORM

SUBMITTAL INFORMATION:

Attached is an Environmental Information Form which is to be filed with all projects in accordance with the California Environmental Quality Act. This form must be accompanied by the applicable processing fee and a legal description of the property (please refer to the fee schedule – Appendix C). If the Environmental Administrator/ City Planner determines that an Environmental Impact Report (EIR) is required, an additional fee will also be required for reimbursement of costs incurred in the processing of the EIR.

If the information requested does not apply to the project, insert "NA" (Not Applicable) in the space provided.

If the project is Categorically Exempt under the provisions of the California Environmental Quality Act, you need only complete Items 1 through 34 on the Environmental Information Form. The determination that the project is Categorically Exempt must be confirmed by a staff planner.

Please contact the Planning Division if you have any questions regarding the Environmental Information Form.

PROCESSING PROCEDURE:

The information in this form will be to conduct an Initial Study of your project. Following interdepartmental review of the project by the Application Review Committee, the Initial Study will be completed by the project's environmental consultant. The Project Planner in consultation with the Environmental Administrator/City Planner will then determine whether a Negative Declaration should be issued or an EIR required. If an EIR is required, the Environmental Review Committee will review the decision and determine the scope of the EIR. The Planning Division will transmit a letter to you describing the procedure to be followed and the specific areas of concern to be addressed in the EIR.

If an EIR is required, the report must be prepared, published and circulated for public review, and any comments received must be responded to before the project can be scheduled for public hearing. Additional public input on the EIR may be provided during the public hearing of the project.

ENVIRONMENTAL IMPACT:

46. What is the street classification of proposed new streets? (e.g., “two-lane collector” or “four-lane major street”, per Circulation Element of the General Plan)_____
47. What is the percentage grade of the steepest street involved in the project? _____
48. What is the right-of-way standard for proposed new streets? (e.g., private, dedicated, to be acquired, etc.)
49. If new water mains for this project will serve areas beyond the project boundary, please indicate the approximate service area on the map.
50. If new sewer mains for this project will serve areas beyond the project boundary, please indicate the approximate service area on the map.
51. Describe the improvements and extensions of existing electrical lines that will be required to serve the project. _____
52. If improvements are to be demolished or removed by the project, please describe them briefly.
_____
53. Identify any roadway or train track located within 500 feet of the project site._____
54. List any other potential noise sources which could affect the project site (i.e., industrial projects, etc.) and give approximate distances._____
55. Describe any noise that will be produced by the project during construction and after the project is completed. (Include equipment operation, blasting, etc. _____
56. Estimate the number of motor vehicle trips generated by the project site currently: _____ ; after development _____.
57. If the project is commercial or industrial, list any air pollutants that the project will emit.
58. To what extent will be project be located within a floodplain? (Specify whether U.S. Army Corps of Engineers Standard Project Flood or 100-year flood.)_____
59. If the drainage from the project will not be discharged into an existing public stormwater drainage system, please describe how it will be accommodated. _____

60. What percentage of the project site will be graded? _____%
61. Volume of cutting: _____ cubic yards; maximum cut-slope ratio will be _____; maximum cut-slope height will be _____ feet.
62. Volume of fill:_____ cubic yards; maximum fill-slope ratio will be _____; maximum fill-slope height will be _____ feet.
63. Does the cut-and-fill volume balance? _____. If not, how will import/export be handled?_____
64. Will the entire site be graded with the first phase? _____ If not, indicate those areas that will be left natural and those areas that will be used as temporary borrow sites. If so, please describe:_____
65. Will the project extract or preclude the extraction of any rock, sand, gravel, or other mineral resources? _____ If so, please describe:_____
66. Describe or indicate on a map any areas of vegetation to be removed by the project (May be combined with Item 40). _____
